Course Title	Chemical Safety Training
Maximum Number of Participants:	12
Duration:	Half day
Certification	

Course details

Current Irish and European legislation places responsibilities on employers with regard to chemical substances. This states that where chemical substances (agents which are likely to cause harm to the Health and Safety of those using them) are being used, employers are required to ensure that affected employees have received information and training on their safe use. Employers must further ensure that this training is carried out on a regular basis.

Objectives

Upon completion of this course, participants will be able to,

- List routes of entry of chemicals into the body,
- Identify health effects of chemicals,
- Identify warning symbols and read relevant product warning labels,
- Use a SDS (Safety Data Sheet),
- Identify and use different types of available PPE (Personal Protective Equipment),

Programme

- Legislation,
- Introduction to chemicals,
- Routes of entry of chemicals,
- Classification of hazardous substances,
- Warning signs,
- Safety Data Sheets,
- Personal Protective Equipment,
